

TREK BUCKET

Everything you take on the trek will need to fit inside a 5 gallon bucket (not including your sleeping items) and weigh no more than 17 pounds (your buckets will be weighed prior to leaving for Martin's Cove). We want to keep the weight of your handcarts at a minimum. 10 people per handcart (x) 17 pounds each = 170 pounds + 100 pounds of water (10 gallons of water) = 270 pounds per handcart.

Each person will need a *cushioned* 5 gallon bucket. You will not only carry your personal items in this, but you will also use it as a seat during our time a Trek. You will NOT be allowed to bring anything else to sit on – no camp chairs, stools, etc.

There are LOTS of ideas on the internet on how to create and decorate your cushioned Trek bucket. You do not need to actually decorate your bucket if you don't want to, but be sure your **name is on it**.
